

To advance our priorities and objectives, a range of services and initiatives will be procured or grant funded by the Public Health Agency (PHA) to improve health and wellbeing outcomes and address major health inequalities.

This portal will contain information on procurement and grant funding opportunities as well as associated specifications and guidance. If you are interested in procurement and grant funding opportunities with the PHA please keep this portal under regular review and note any timescales set for responses.

The PHA welcomes responses from all interested parties, large or small, whether community, voluntary or private as long as they can meet the requirements identified and demonstrate that they can deliver the benefits expected.
