Health Protection

Help us to prevent infections spreading

The easiest way to pass on germs is with our hands so when staff clean their hands before and after touching each patient, it helps stop the bugs spreading.

There are **two** main ways to clean hands:

This leaflet is part of an extension of the clean**your**hands campaign, aimed at preventing the spread of healthcare associated infections (HCAIs) in community healthcare settings including primary care and dental services, residential and nursing homes (including independent sector homes), hospices and independent clinics/hospitals. It is designed to heighten awareness in patient/relative waiting areas of how healthcare staff can help protect patients from avoidable infections by cleaning their hands using proper techniques.

Due to licensing restrictions, this leaflet is not available for download. Limited numbers are available from local HSC Trusts (Belfast HSCT and South Eastern HSCT on 028 9056 5862; Southern HSCT on 028 3741 2887; Northern HSCT on 028 2563 5575; Western HSCT on 028 7186 5127).
