Cochrane Collaboration Training Courses on Systematic Reviews

**Background**  
The primary objective of systematic reviews is to identify, appraise and synthesize the best available evidence to inform practice and policy. The Cochrane Collaboration is the largest, most comprehensive, and most up-to-date source of systematic reviews. The Cochrane Collaboration is a not-for-profit organization that provides free access to its evidence-based reviews. The Cochrane Collaboration is a global network of researchers, clinicians, and health professionals who work together to produce and maintain systematic reviews. The Cochrane Collaboration is a global network of researchers, clinicians, and health professionals who work together to produce and maintain systematic reviews. The Cochrane Collaboration is a global network of researchers, clinicians, and health professionals who work together to produce and maintain systematic reviews.
