[Service Development and Screening](#)

This leaflet explains what syphilis is and how it can be contracted through several forms of intimate contact including kissing, unprotected sex or genital contact. It explains what the possible symptoms may be like, as half of the people infected with this infection show no symptoms at all. It explains how syphilis is diagnosed and treated and how to protect yourself against catching it. Details of the [Genito Urinary Medicine \(GUM\) Clinics](#) in Northern Ireland are included in the leaflet together with an explanation of the services provided by them.

Details

Format

55mm x 95mm, 8 pages, leaflet.

Target group

18 to 30 year olds
