*Please note:
Data reflect laboratory reported data from Trust Clinical Laboratories and are correct at time of publication. Data obtained from HSC Pathology.
Duplicate specimens removed in accordance with PHC Guidelines.
Positive blood culture only in blood/bone marrow culture, or where the most susceptible site is described as culture/bone marrow, soft-tissue/joint infection, genitourinary/CSF/LCR infection or otherwise. Data may include a small number of specimens that are culture negative but are antibody positive.
Please note this is a historical data extract so will appear different from previous reports.
Legionella are no longer included in table due to changes in testing practices.
