Positive Blood Cultures:
Laboratory Reports, NI
1st Jan 2010 - 30th June 2016*

Gram Negative Bacteria	2010	2011	2012	2013	2014	2015	2016
Acinetobacter sp.	12	17	26	20	20	13	16
Acinetobacter baumannii	2	5	5	2	2	5	1
Enterobacter sp.	2	5	6	9	7	3	2
Enterobacter cloacae	16	14	13	10	14	14	9
Enterobacter aerogenes	12	12	12	17	15	15	14
Escherichia coli	194	115	130	124	125	149	126
Enterobacteriaceae	1	2	1	1	1	1	1
Haemophilus influenzae (non-typeable)	19	21	15	19	12	16	8
Haemophilus influenzae type b	1	2	4	2	1	1	3
Haemophilus parainfluenzae	2	2	2	2	2	2	2
Legionella sp.	3	2	3	2	2	2	0
Legionella pneumophila	3	2	3	2	2	2	0
Proteus sp.	107	82	121	124	124	125	111
Proteus mirabilis	1	2	2	3	4	2	3
Pseudomonas aeruginosa	11	11	22	22	24	26	26
Pseudomonas cepacia	1	1	2	1	1	1	1
Serratia sp.	1	1	1	1	1	1	1
Serratia marcescens	1	1	1	1	1	1	1
Other gram-negative bacteria	21	21	18	18	18	18	18
Total	178	144	187	188	191	212	142

*Please note:
Data reflect infections reported to the Public Health Agency and are correct at the time of publication. Data are based on laboratory reports.
Duplicate specimens received in accordance with PHG Guidelines.
Please note that some data are reported as 'Other Gram Negative Bacteria' as the exact species was not identified.
Data are reported as 'Other Gram Negative Bacteria' as the exact species was not identified.
Please note that this is a preliminary data report and will appear different from previous reports.
Legionella are no longer included in table due to changes in testing practices.

Tables showing Gram Negative, Gram Positive and Anaerobic Bacteraemias reported in Northern Ireland, from 2010 to 2016.
