## Health Protection

Positive Blood Cultures:  
Laboratory Reports, NI  
1<sup>st</sup> Jan 2010 - 30<sup>th</sup> June 2016\*

Gram Negative Bacteria	2010	2011	2012	2013	2014	2015	2016
Acinetobacter sp.	13	17	26	20	20	19	16
Acinetobacter baumannii	2	5	5	5	2	5	1
Enterobacter sp.	2	5	6	6	9	7	4
Enterobacter cloacae	16	16	15	10	14	14	9
Enterobacter aerogenes	12	12	12	12	12	12	14
Escherichia coli	384	315	338	328	325	348	292
Enterobacteriaceae	1	0	0	0	0	0	0
Haemophilus influenzae (non-typeable)	19	21	15	19	12	16	8
Haemophilus influenzae type b	1	2	4	2	1	4	3
Haemophilus parainfluenzae	2	2	2	2	2	2	2
Legionella sp.	0	0	0	0	0	0	0
Legionella pneumophila	0	0	0	0	0	0	0
Moraxella sp.	1	2	2	2	4	2	3
Moraxella catarrhalis	1	2	2	2	4	2	3
Pseudomonas aeruginosa	31	31	32	22	29	36	26
Pseudomonas cepacia	1	1	2	1	4	1	1
Pseudomonas fluorescens	3	4	5	4	7	7	7
Serratia sp.	1	1	1	1	1	1	1
Serratia marcescens	1	1	1	1	1	1	1
Other gram-negative bacteria	21	21	21	21	21	21	21
Total	178	168	187	168	171	173	143

\*Please note:  
Data reflect laboratory reported data from Trust Clinical Laboratories and are correct at time of publication. Data obtained from HSC Pathology.  
Duplicate specimens removed in accordance with PHC Guidelines.  
Positive blood culture only in blood/bone marrow culture, or where the most susceptible pathogen is identified as a contaminant, or where the most susceptible pathogen is identified as a contaminant.  
Please note this is a historical data report so will appear different from previous reports.  
Legionella are no longer included in table due to changes in testing practices.

Tables showing Gram Negative, Gram Positive and Anaerobic Bacteraemias reported in Northern Ireland, from 2010 to 2016.
