[Directorate of Nursing, Midwifery and Allied Health Professions](#)

This is the first update newsletter of the Speech, language and communication therapy action plan. The action plan was developed by the Department of Health, Social Services and Public Safety (DHSSPS) with the aim that all children and young people at risk of or presenting with speech, language or communication needs will be able to benefit from timely support and integrated services that best meet their requirements.

The Public Health Agency (PHA), in partnership with the Health and Social Care Board (HSCB), has been tasked with implementing the action plan.

The update includes news on the publication of the Healthy child, health future framework and highlights other points of progress so far, including the development of the Family Support NI website. There is also an invite for parents to join a focus group to influence and assist with the implementation of the action plan.

## Details

Format

4 page PDF, A4
