[Health Protection](#)

This leaflet is for pregnant women who have been diagnosed with syphilis. It provides information on the care pathway for these women, including referral to GUM, treatment and long-term protection for the baby.

Please note, translations are based on a previous version of this leaflet (2015). These are currently being updated and will be available here soon.

Printing instructions are provided in a PDF below.

Details

Format

4 page A5

Target group

Pregnant women with syphilis
