

In support of our action against COVID-19, we must ensure that all staff and volunteers, irrespective of where they work, have access to the information and support they may need over the coming months and that everyone's contribution is valued and appreciated. The Take 5 message is for everyone and has been adapted to help address staff and volunteer health and wellbeing needs.

TAKE 5 AGAINST COVID #CompassionateCare #InItTogether

With our usual connections on hold for the moment, it is so very important that Health and Social Care staff and volunteers look after their own physical, mental and emotional wellbeing. All Health and Social Care organisations want to help with this.

Supporting the Wellbeing Needs of our Health and Social Care Staff During COVID-19: A Framework for Leaders and Managers

A new framework has been developed and produced in partnership with the Trusts, PHA, HSCB, Department of Health and the Health Trade Unions. It guides leaders and managers of services to respond positively to the demands being placed on their staff. The framework captures the great initiatives that are already being taken by Trusts and other service providers and builds on them. The content on this website also signposts leaders, managers and staff to the best health and wellbeing resources and ideas.

As we travel this journey together, let us help each other stay true to our HSC values with compassionate care at the forefront of everything we do. Stay safe, look out for each other and look after your health. This is temporary - there are brighter days ahead.
