## COVID-19 vaccination for children and young people aged 12 to 15 years

### What is COVID-19 or coronavirus?

COVID-19 is an illness sometimes called coronavirus.

Most children who get COVID-19 have no symptoms. Those that do, have mild symptoms like a bad cold.

A few children and young people will get very poorly and have to go to hospital.

This simple guide to COVID-19 vaccination for at-risk children aged 12 to 15 outlines the benefits of vaccination, who is eligible, potential side effects and what to do next. You should read this before your vaccination.

## Details

Format

A5 12 pages

Target group

At-risk children aged 12-15 receiving the COVID-19 vaccine
