[Health Protection](#)

Coronavirus vaccine for children aged 5 to 11 who are most likely to get very poorly from coronavirus.

This information is for parents and carers of these children.

It is about coronavirus, also known as Covid-19 and the vaccine.

Coronavirus is an illness that can make you poorly.

Most children and young people won't have any symptoms or feel very poorly if they get coronavirus.

1

This easy read guide is for parents and carers of children aged 5 to 11 who are in the highest risk category and are being offered the children's dose of the COVID-19 vaccine. It explains about the vaccine and how to book an appointment for your child's vaccination and what happens at the appointment. The booklet also explains about potential side effects and the Yellow Card reporting scheme.
