[Health Protection](#)

The image shows the cover page of a document. At the top right is the HSC Public Health Agency logo. The main title is 'Group A Streptococcus in children (including scarlet fever and invasive Group A Streptococcus)'. Below the title is a purple bar with the text 'Frequently asked questions' and 'January 2023'. A light blue box contains introductory text and a list of related guidelines. Below this is a section titled 'Frequently Asked Questions' with sub-sections for 'General information' and 'Invasive Group A Streptococcus (IGAS)'. At the bottom is a purple footer bar with the document title and 'Page 1'.

HSC Public Health Agency

Group A Streptococcus in children (including scarlet fever and invasive Group A Streptococcus)

Frequently asked questions January 2023

These FAQs have been developed to provide information and advice on Group A Streptococcus and its public health management, including in educational settings, and are aimed at healthcare professionals and those working in education and early years settings.

They should be read in conjunction with:

- UK guidelines for the management of contacts of invasive group A streptococcus (iGAS) infection in community and education settings
- Guidelines for the public health management of scarlet fever outbreaks in schools, nurseries and other childcare settings
